DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claim 1 recites a broadband slot antenna comprising a common input terminal, a conductive plate having a common slot formed in a predetermined area and a plurality of slot halves formed separately and respectively communicating with the common slot via a plurality of slot necks spaced by a predetermined distance, a plurality of feed lines, each having one terminus connected to the common input terminal for applying power to the conductive plate at a cross coupling point, and a dielectric layer disposed between the conductive plate and the plurality of feed lines.

None of the prior arts shows or suggests this slot antenna.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
